

### Integrated Quality and Ecodesign Policy

**TBI (TEKNO-BAU IBÉRICA SA)** is a company dedicated to the development of architectural and engineering projects, with offices in Barcelona (Spain) and Xanten (Germany).

**TBI** is committed to excellence for all projects it undertakes, obtaining the satisfaction of its clients and society in general, adding value to the surroundings where they are located.

We advocate for building sustainability, proposing innovative designs that are environmentally friendly.

We develop projects based on knowledge and analysis of applicable legislation as well as environmental considerations, taking appropriate measures to prevent contamination generated by materials and products throughout the life cycle.

Recognizing that our working professionals are the greatest value of the company, **TBI** allocates the necessary resources to fulfil the established requirements and contractual agreements, boosting the motivation of the team to share the philosophy, vision and company policy, and investing in continuing education for our team.

The implementation of this system is mandatory for all employees of **TBI**, to ensure:

- Participation, improvement and communication of business strategies and objectives.
- The commitment in meeting the requirements of the Integrated Management System and its continuous improvement.
- Customer satisfaction, carefully understanding their needs and insights, through a systematic process of continuous improvement that requires the cooperation and participation of all members and partners of **TBI**.
- Good management and organization, to provide sufficient and sustained profitability to ensure business continuity.

This policy is to provide a framework for setting strategic objectives.

Barcelona, December 19, 2012.

**Miguel Jordá Petersen**  
CEO, TEKNO-BAU IBÉRICA
